INTRODUCTION

This document contains all information needed for appropriate and safe servicing of PH and PS series hot air balloons.

This parts catalogue has been designed to illustrate and easily identify of spare parts and accessories which are necessary for maintenance of the specified aircraft model.

Parts figures or pictures are not to scale.

For Pasha Balloons maintenance and repair instructions, please refer to the latest revision of the Pasha Balloons Maintenance Manual, which can be downloaded from <https://www.pashaballoons.com/support/>.

Each item in this illustrated part catalogue has a dedicated Part Number (P/N). Part number should always be quoted when ordering. When ordering, further information such as model, serial number, size and colour may also be required.

If you require an item which is not included in this catalogue, then please contact support@pashaballoons.com.

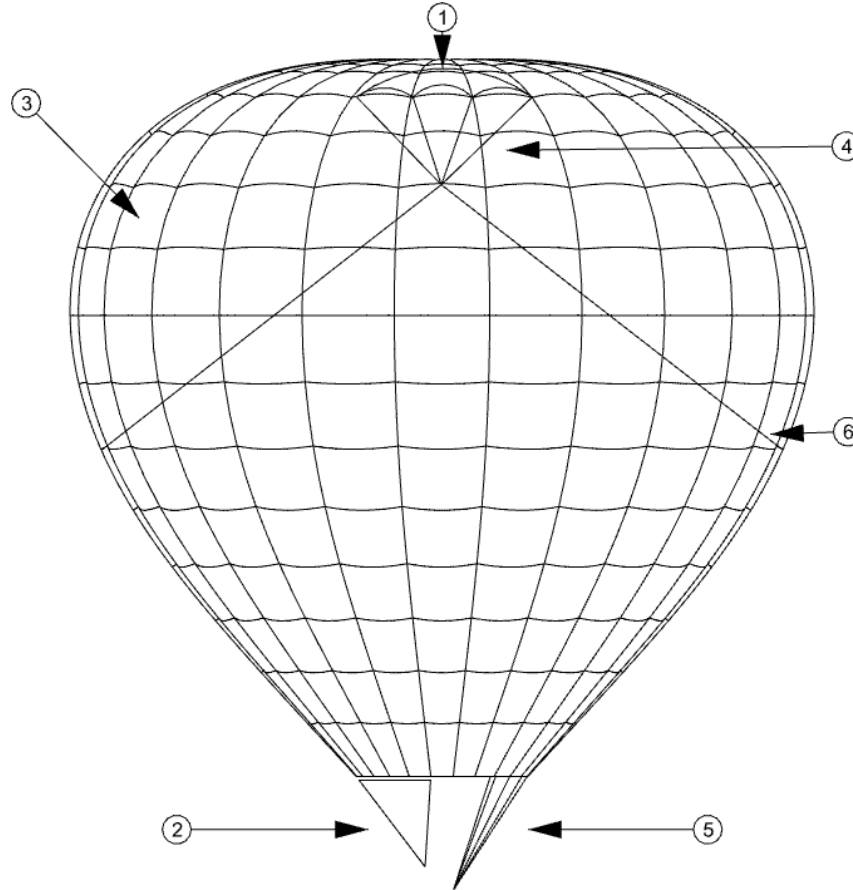

Pasha Balloons has reserved the right to change, substitute or delete any parts illustrated in this catalogue without prior notice. Certain parts shown may have to be ordered especially and may not be held in stock.

STEEL WIRES

Steel wire lengths can vary depending on the position on the envelope. For easy identification of wires there are 4 identical groups (A,B,C,D) of wires. When ordering envelope wires, burner frame type or dimensions, wire group number and whether the wire is single or pair must be given at the spare part order form. If only one of the pair wires needs repair or replacement, both parts must be replaced.

Information about the hot air balloon on the spare part order form (envelope and basket size, types and serial numbers) must be filled carefully and completely. It should also be stated whether a quick link is requested or not.
